

● ● ● | The Determination of the Effectiveness of Catecholase from Various Fruits and Vegetables

Daniel and Danielle Student

● ● ● | Background Information

- Should give all information used or found that was used in order to help answer the research question.
- Don't use large amounts of text.

● ● ● | Research Questions

- What substances have catecholase?
- What substance has the most effective catecholase?

Hypotheses Tested

- If..... Then.....
- If..... Then.....
- Etc....

Procedures

- Do not print it out word for word.
Summarize and show if possible.

Results

- Show Data tables and graphs to summarize your results.
- Don't have large amounts of text.

Conclusion

- What are your findings
- Answer the questions
- Areas of Weakness
- New questions to pursue based on your findings.

Further Experiments

- What would you do with more time.
- What parts of the experiment would you explore to help answer the research question.

References

- Websites used
- People consulted
- Partners
- Books or journals used
- Follow proper format

Pointers for the format

- White background with black text is easiest to see
- 30 pt font is best or larger
- Keep text to a minimum on each page
- Pictures really help
- Graphs and charts really help
- Talk to the people not to the ppt slide.
Don't read to us..... we can read.
