

Homework Questions from the IB Guide | Photosynthesis

How does a plant harvest the sun's energy?

What is the structure of a chloroplast?

What wavelengths of light does photosynthesis target?

What are the pigments involved in the light reactions?

What is the difference between absorption and action spectra?

How does the plant convert light energy into chemical energy?

Homework Questions from the IB Guide | Photosynthesis

What could you measure to monitor the rate of photosynthesis?

How has the plant adapted to harvest light?

What effect does temperature, light intensity, CO₂ have on rate of photo?
